

**Global
Ecommerce.**

Solved.

ClearPath™ Services Suite

We've solved your global ecommerce needs. We power global ecommerce for the retail Ecommerce community, with a powerful SaaS solution.

We've solved it. Now it's simple.

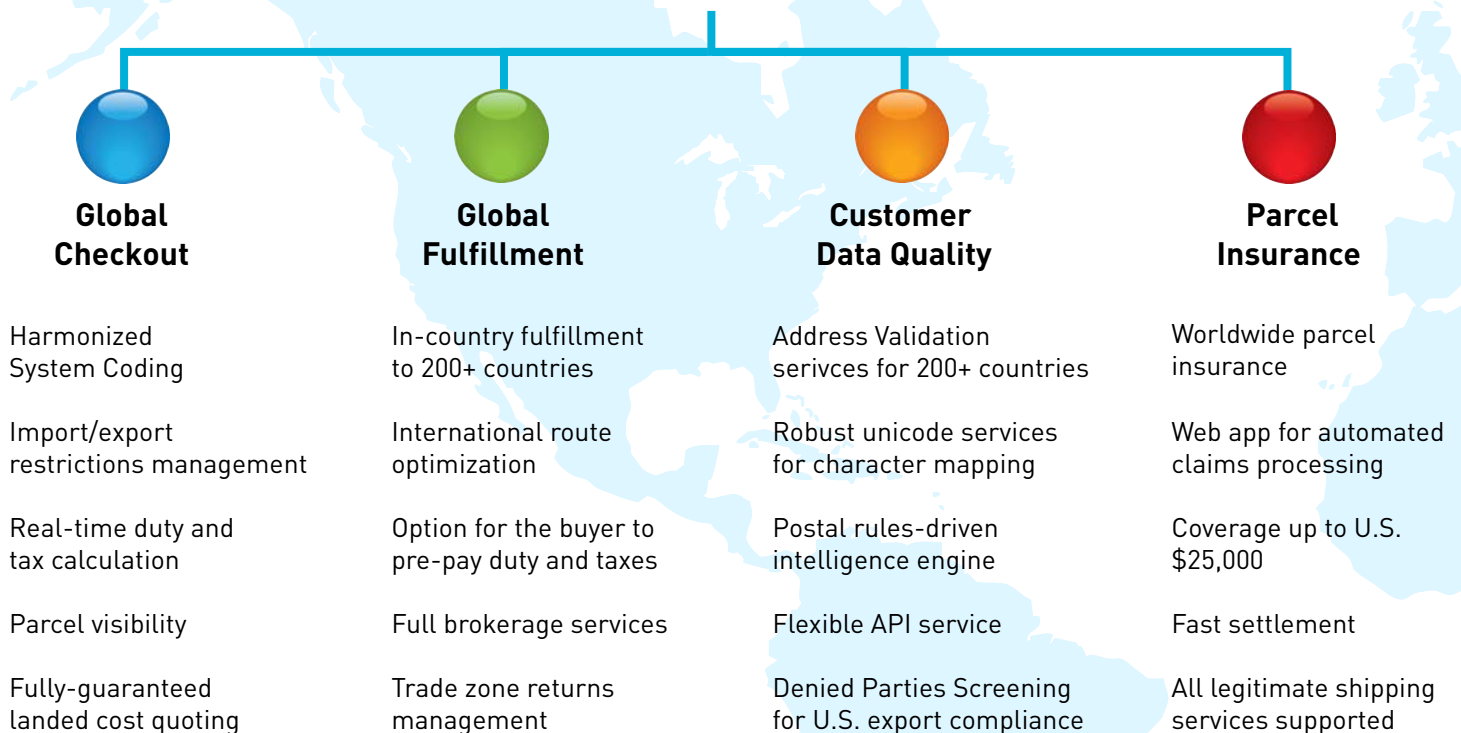

Everyone wants to sell globally. And why not? Analysts report that opening up international doors is generating incremental revenue growth of 25% for retailers, with little to no additional fixed costs. So it's not the opportunity that stops retailers—it's the complications.

But now global Ecommerce is simple, with an innovative solution from Pitney Bowes. We've solved the complexities by combining SaaS Ecommerce technology with an international delivery network. It's a market-leading solution, from the company with years of Ecommerce shipping experience. We pioneered shipping technology in the dot-com era. We're experts in running an international parcel network. And we've invested millions to bring together our global shipping solution. As one of the most trusted brands in global Ecommerce, we offer the complete package for your parcels.

Introducing the ClearPath™ Services Suite

Our ClearPath™ Services Suite is a modular suite of API-driven web services enabling retailers to grow their business by selling internationally.

ClearPath™ Services Suite

One simple integration; Many services.

It's flexible, powerful, and simple to integrate. A single integration accesses our entire suite of solutions, which is much simpler, more cost-effective and less time-consuming than integrating across multiple suppliers. Integrating with our SaaS technology means no issues with software installation or compatibility and no concerns about scalability or load limitations as needs grow. Ongoing support from one trusted source brings convenience and confidence.

Pitney Bowes provides world-class professional service expertise. We offer full, expert implementation and technical support, eliminating the need to contact multiple resources. With Pitney Bowes, the people who integrate are the people who maintain and operate. See below for a look into our onboarding process.

Pitney Bowes Onboarding Process

Pitney Bowes makes onboarding straight-forward, effective, and simple with four defined phases:

We will work with you to develop a solution that fits your unique needs. From developing the solution framework, to setting up your sandbox, to certification and launch, we offer you as much help as you need to open up international doors. Our APIs are flexible and can be used to design a powerful international Ecommerce solution.

About us

Pitney Bowes is the global technology company that provides software, hardware, and services to integrate communication channels and enable revenue growth. As a corporate-backed Ecommerce venture, Pitney Bowes Ecommerce Solutions offers market-proven solutions for international Ecommerce. Its SaaS-based solutions equip leading retailers to sell to international customers, solve international Ecommerce challenges, and grow international retail business.

Global Ecommerce.
